

Tobechukwu Marizu

Freelance Web Developer & Computer Scientist

One thing you might not know about me: I'm a problem solver at heart. I love tackling complex backend challenges and turning them into efficient, scalable systems, while seamlessly connecting them to dynamic front-end experiences. With 3+ years of experience in Django, Node.js, Python, and React, I build backends that not only work but *work smart*. I thrive on creating solutions that make apps faster, more reliable, and enjoyable to use.
