

Tobechukwu Marizu

Software Engineer (Backend-Focused)

Asaba, Nigeria | tobemarizu@gmail.com | github.com/tobe30 | marizu-portfolio.vercel.app | LinkedIn | X Profile

Professional Summary

Software Engineer with 3+ years of experience building scalable web applications using Django, Node.js, React, PostgreSQL, and MongoDB. Backend-focused with strong experience designing RESTful APIs, implementing secure authentication systems, optimizing database performance, and deploying production-ready applications. Comfortable working in fast-paced environments and collaborating across cross-functional teams.

Technical Skills

- Languages: Python, JavaScript, SQL, PHP
- Frontend: React.js, HTML, CSS
- Backend: Django, Node.js, Express
- Databases: PostgreSQL, MongoDB, MySQL
- Cloud & Deployment: AWS S3, Render, Vercel, Cloudinary
- Tools: Git, REST APIs, JWT, OAuth

Professional Experience

Software Engineer (Frontend) – CropCura | 2025 – Present

- Designed and developed the company landing page in collaboration with UI/UX designers
- Built the Agricultural Loan Risk Dashboard interface used by financial institutions
- Implemented data visualization components for high-risk loan insights
- Integrated satellite verification and AI alert data into responsive dashboard views
- Collaborated with backend and mobile engineers to deliver integrated product features
- Optimized frontend performance and ensured responsive cross-device compatibility

Freelance Software Engineer (Remote) | 2022 – Present

- Designed and implemented scalable backend systems using Django and Node.js
- Built secure RESTful APIs with JWT/OAuth authentication
- Optimized database queries, reducing page load time by up to 40%
- Integrated third-party APIs and payment workflows
- Deployed production applications using AWS S3, Render, and Cloudinary
- Translated business requirements into functional, production-ready systems

Web Development Instructor – Unique Institute | 05/2022 – 04/2023

- Instructed over 10 students in HTML, CSS, JavaScript, MySQL, and PHP
- Developed and delivered curriculum and instructional materials for beginner to advanced students
- Led hands-on projects and authored tutorials

Selected Projects

E-commerce Platform (Gabbs – Retail Prototype)

- Designed and developed an e-commerce backend inspired by local retail expansion needs (Gabbs, Asaba)
- Implemented product listing, cart, checkout, and order management workflows
- Built secure authentication and checkout workflow
- Optimized database queries for performance and scalability

Banking & Currency Exchange Web Application

- Built secure backend system using Django
- Implemented KYC verification and transaction workflows
- Integrated real-time exchange rate APIs
- Designed secure authentication and recipient management systems

AI Academic Tool (Tessi)

- Developed backend logic for CGPA calculation and AI-assisted responses
- Integrated AI API for dynamic academic analysis
- Designed REST API architecture and deployed production version

MERN-Based Learning Management System

- Built backend API for user authentication and course enrollment
- Implemented role-based access control
- Structured MongoDB schema for scalable content delivery

Education

B.Sc. Computer Science | Alex Ekwueme Federal University | 2022 – Present
