

TOBECHUKWU MARIZU

BACKEND-FOCUSED SOFTWARE ENGINEER

Asaba, Nigeria | tobemarizu@gmail.com | GitHub | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Backend-focused software engineer with 4+ years of hands-on web development experience building and deploying SaaS products, REST APIs, dashboards and marketplace platforms. Skilled in Django, Node.js, React, PostgreSQL and MongoDB, with practical experience in secure authentication, role-based access control, database design and cloud deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, PHP | **Backend:** Django, Node.js, Express, REST APIs | **Frontend:** React, Vite, Tailwind CSS, HTML, CSS | **Data & Cloud:** PostgreSQL, MongoDB, MySQL, AWS S3, Cloudinary, Render, Vercel | **Security & Tools:** JWT, OAuth, Git, GitHub

PROFESSIONAL EXPERIENCE

Full-Stack Developer | CropCura 2025 - Present

- Built responsive product interfaces for an agricultural loan-risk platform used by financial institutions, including portfolio monitoring and high-risk loan views.
- Integrated satellite-verification and AI-alert data into dashboard workflows and developed reusable data-visualization components.
- Collaborated with UI/UX, backend and mobile engineers to deliver integrated features and improve cross-device performance.

Founder & Full-Stack Developer | Elomaze Sep 2024 - Present

- Founded and built a MERN-based student accommodation and community platform, now in public testing, for discovering housing and trusted local information.
- Designed REST APIs and role-based workflows for students, agents and administrators; implemented JWT/Google OAuth authentication, property and service listings, search, saved items and community Q&A.
- Owned frontend, backend, database and deployment end to end, and grew an early community of 150+ members through targeted campaigns and campus outreach.

Web Development Instructor | Unique Institute May 2022 - Apr 2023

- Taught 10+ students HTML, CSS, JavaScript, PHP and MySQL through practical projects and structured learning materials.
- Developed beginner-to-advanced curricula, tutorials and hands-on assessments.

SELECTED PROJECTS

AE-FUNAI Journal Management Website | Django 2026

- Rebuilt and deployed a responsive academic journal website with publication workflows, search-friendly pages and production hosting on cPanel/Passenger.

Ovara Inventory Management System | Django, PostgreSQL 2025

- Converted spreadsheet-based inventory operations into a web dashboard for tracking stock, transactions and business reporting.

QuickAI Content Platform | React, Node.js, PostgreSQL 2025

- Built and deployed an AI-assisted SaaS product with authentication, usage limits and text/image generation workflows.

EDUCATION

B.Sc. Computer Science | Alex Ekwueme Federal University Ndufu-Alike Expected 2026
